how to document on reverse...

Air Frame Clear

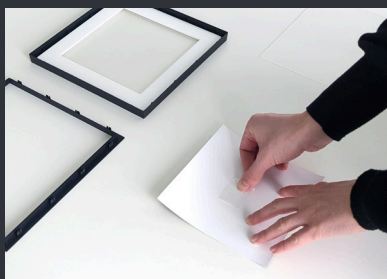

How to...

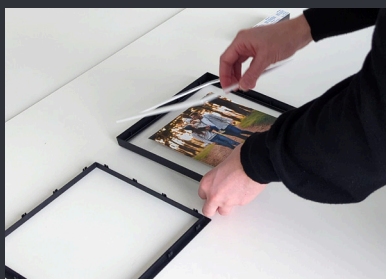

1. Insert the thicker clear window in to the back frame removing any protective film.

2. Insert the jig into place

3. Apply the double sided adhesive to the back of your image

4. Apply the image using the jig to the clear window

5. Remove the jig and place front clear window into the front of the frame removing any film

6. Click the front of the frame and back together by pushing the two pieces of frame together.

7. Remove unprinted release liner from pad and push down on to the frame firmly using the top visible tape strip as a guide

8. Remove the adhesive tabs and apply to the wall
